## Preface

The Classification of Individual Consumption According to Purpose (COICOP) is the international reference classification of household expenditure. The objective of COICOP is to provide a framework of homogeneous categories of goods and services, which are considered a function or purpose of household consumption expenditure.

COICOP is an integral part of the System of National Accounts (SNA), but it is also used in several other statistical areas, such as: household expenditure statistics based on household budget surveys and the analysis of living standards; consumer price indices; international comparisons of gross domestic product (GDP) and its component expenditures through purchasing power parities; and statistics relating to culture, sports, food, health, and tourism.

The idea of classifying household consumption expenditure at the international level dates back to the year 1923 and resulted three years later into the first, still very broad classification of household expenditure elaborated by the International Conference of Labour Statisticians. When the first version of the SNA was published in 1953, it contained also a classification of private consumption expenditure, which then evolved with each new version of the SNA.

The first classification under the name COICOP was adopted by the United Nations Statistical Commission in March 1999, together with the other three functional classifications of the SNA: the Classification of the Purposes of Non-Profit Institutions Serving Households (COPNI), the Classification of the Functions of Government (COFOG), and the Classification of the Outlays of Producers According to Purpose (COPP).

This is the first revision of COICOP. The new classification is the outcome of a revision process that started formally in 2015 and involved contributions from many classification experts and users around the world. COICOP 2018 is more detailed than the previous version, responding to the users' need for more detail, and addresses several other issues that required a revision of the classification. The new COICOP 2018 reflects the significant changes in goods and services in some areas, improves the links of COICOP to other classifications, and addresses emerging statistical and policy needs of several international organizations.

In March 2018, the 49<sup>th</sup> Session of the United Nations Statistical Commission considered and endorsed the revised COICOP classification – COICOP 2018 as the internationally accepted standard.

# I. Introduction

## A. Overview and scope of the classification

1. The 2008 SNA<sup>6</sup> uses four classifications of expenditure according to purpose. These four classifications are used to analyse consumption by different institutional sectors according to the purpose for which the expenditure is undertaken. These classifications are referred to as functional classifications and are as follows:

COICOP: Classification of Individual Consumption by Purpose

COPNI: Classification of the Purposes of Non-Profit Institutions Serving Households

COFOG: Classification of the Functions of Government

COPP: Classification of the Outlays of Producers by Purpose

2. The four classifications are designed primarily to answer the question of why outlays are incurred. They classify transactions undertaken by households, non-profit institutions serving households (NPISH), government and producers which result in “payables” – that is, money paid or due for the acquisition of current and capital goods or of labour and other services, for the acquisition of financial assets or for the extinction of financial liabilities.

- COICOP is used to classify only a single kind of outlay – namely, the individual consumption expenditures of households, NPISH, and general government.
- COPNI and COFOG are used to classify a range of transactions, including outlays on final consumption expenditure, intermediate consumption, gross capital formation and current transfers, by NPISH and general government respectively.
- COPP is used to classify intermediate consumption and capital outlays of financial and non-financial corporations, or producers.

3. The objective of COICOP is to provide a framework of homogeneous categories of goods and services, which are considered a function or purpose of household consumption expenditure, which are those expenditures that are made for the benefit of individual persons or households.

## B. Individual consumption

4. Individual consumption expenditures are incurred by three institutional sectors, namely: households, NPISH and general government:

- All household consumption expenditures are defined as individual and are presented in COICOP 2018 **Divisions 01 through 13**.

- **All** consumption expenditures of NPISH are also treated, by convention, as being for the benefit of individual households and are presented in COICOP 2018 **Division 14**.
- Only **some** of the consumption expenditures by general government are defined as individual. Expenditures on general public services, defence, public order and safety, economic affairs, environmental protection, and community amenities are considered to be for the benefit of the community as a whole rather than for individual households. They are termed *collective consumption expenditures* (or *actual final consumption of general government* or *actual collective consumption*) and are excluded from COICOP. COICOP 2018 **Division 15** identifies those government expenditures that are regarded as individual and classifies them by purpose, namely, housing, health, education, social protection, recreation, and culture.

5. In the SNA, the individual consumption expenditures of both NPISH and general government are termed *social transfers in kind* and are added to the individual consumption expenditures of households to obtain an aggregate called *actual final consumption of households* (or *actual individual consumption*). By bringing together the relevant expenditures of households, NPISH, and general government, COICOP identifies the expenditures that make up this aggregate and classifies them according to the purposes they are designed to achieve.

## C. Uses of COICOP

6. COICOP is an integral part of the SNA, but it is intended also for use in several other statistical areas such as: household expenditure statistics based on household budget surveys and the analysis of living standards; consumer price indices (for which it is used to establish weights and aggregate prices); international comparisons of gross domestic product (GDP) and its component expenditures through purchasing power parities; and statistics relating to culture, sports, food, health, and tourism.

7. For all these uses, the basic COICOP classification needs to be more detailed in terms of subcategories; and at the same time there are clear advantages in maintaining the basic structure of COICOP to enable comparison between countries, over time and between statistics in different domains. It must be recognized, however, that COICOP follows the concepts and definitions of the 2008 SNA and these are not necessarily directly applicable, at the most detailed level, for other applications. For example, in household budget surveys it is not practical to ask households about expenditure on insurance service charges as required by COICOP, and in consumer price indices some countries may include interest on housing loans, which is excluded from COICOP.

8. The purposes defined in COICOP are based on the classifications of consumption expenditures which national statistical offices have developed for their own use and which have been found to serve a variety of analytic applications. Although COICOP is not strictly linked to any particular model of consumer behaviour, the purposes broadly reflect differences in income elasticities. For example, low-income households spend relatively high proportions of their budgets on food, clothing and housing while richer households spend more on transport, education, health, and recreation.

9. COICOP 2018 class and subclass levels are also divided into “services” (S), “non-durables” (ND), “semi-durables” (SD) and “durables” (D). This supplementary classification provides for other analytic applications. For example, it is sometimes useful to estimate the stock of “capital goods” held by households; COICOP classes identified as “durables” provide the basic elements for such estimates.

10. COICOP is also useful for the collection and dissemination of data on expenditures and consumption of food worldwide, which accounts for a considerable share of household expenditure, particularly in developing countries<sup>7</sup>. However, previous versions of COICOP lacked suitable detail which resulted in heterogenic food classification lists across countries and consequently limited international comparability.

11. Because of the importance of having comparable information on food purchased and consumed, Division 01 (Food and non-alcoholic beverages) has been significantly revised. The additional detail of Division 01 allows for:

- (a) a common framework and reference classification for food lists for household budget surveys;
- (b) the compilation and comparison of consumption data coming from other sources, such as food and nutrition surveys (in which detail on food goes generally beyond COICOP); and
- (c) the reconciliation of data coming from other domains, such as production and trade.

12. The additional detailed classification of Division 01 includes new goods grouped by source (e.g., cereal, meat, seafood), where raw primary commodities are at the top of the hierarchy within each group, followed by processed commodities and preparation of composites. A new class for ready-made food and other food goods n.e.c. has also been introduced to Division 01.

13. In addition to the new detail available related to food due to the addition of a subclass level in COICOP 2018, an additional 269 codes at the six-digit level are also provided in an annex to supplement the five-digit subclass structure. This Annex 1 has been prepared by the Food and Agriculture Organization of the United Nations (FAO) as a guideline for countries to further expand Division 01 in their national versions (see section “Optional high detail structure for food products”, paras. 21 to 23).

14. The World Health Organization (WHO) is supporting a methodological research project aiming at improving the measurement of health expenditures in household surveys and COICOP 2018 plays a critical role to achieve this as most household budget surveys or household income / expenditure surveys do follow this classification. COICOP enables the measurement of the financial burden households are exposed to because of the health expenditures they face when using health care services. Such measurement is critical to inform the Sustainable Development Goals agenda.

15. Expenditure by individuals and households on cultural or sporting goods and services can be considered as a proxy for participation in cultural and sport activities, which in turn provides the key to completing the analysis of data available from other sources (e.g., dedicated surveys on cultural participation).

## **D. COICOP 2018 structure and coding system**

16. The COICOP 2018 has a hierarchical structure consisting of four (4) levels with the number of categories, and therefore the level of detail increasing from the two-digit level to the five-digit level. The example below demonstrates the coding system:

Division	03	CLOTHING AND FOOTWEAR
Group	03.1	CLOTHING
Class	03.1.1	Clothing materials (SD)
Subclass	03.1.1.0	Clothing materials (SD)

<sup>7</sup> World Bank, Global Consumption Database: <http://datatopics.worldbank.org/consumption/>

17. Each of the categories are numerically coded where a period between the digits indicating the different levels. The division level is denoted by a two-digit number (Divisions 01 to 15). The group, class and subclass levels consist of one additional digit each. Sequential numbering is used at the division and group levels starting with 1. If a classification category is not further subdivided at the next lower hierarchical level, a zero (0) is used. Nine (9) is used to designate residual categories at the class and subclass levels (e.g. 04.4.4.9 Other services related to the dwelling).

18. The number of categories at each level of the classification in COICOP 1999 and COICOP 2018 are presented in Table 1.

**Table 1 Comparison of the number of categories between COICOP 1999 and COICOP 2018 by level**

COIOP level	Number of categories	
	COICOP 1999	COICOP 2018
Division	14	15
Group	58	63
Class	157	186
Subclass	NA	338

## **E. Use of different levels of the classification**

19. It may be desirable to utilize less detailed classification categories of COICOP for some areas of statistics, or where the number and size of the categories for which reliable statistics are presented may depend on both their source and confidentiality considerations. For example, it may not be feasible to present data on the different purposes of health inpatient / outpatient services (e.g. dental, curative, rehabilitative or long term) if not based on a household survey. Or it may not be necessary to present data on household consumption expenditures in as great detail in national accounting as in price statistics. By providing four hierarchical levels (divisions, groups, classes and subclasses), COICOP 2018 provides a framework for comparable classification of data at different levels of detail. It is important to note, however, that the fact that a category has been defined at the class level in COICOP will not prevent it from being larger in a particular national economy than a category defined at the group level or even at the division level in another national economy.

20. Similarly, for specific domains, such as Food, the detail provided by COICOP 2018, even at its most detailed level, will often not be sufficient for the required analysis. In such cases, COICOP 2018 subclasses can be further subdivided for specific purposes, as necessary (see paras. 21 to 23). It is suggested, however, that the additional detailed categories still be aggregated to the existing COICOP subclasses for comparability reasons.

## **F. Optional high detail structure for food products**

21. There are many applications of the COICOP for which different levels of detail may be needed. To satisfy different user needs, rearranging the COICOP structure to form alternative structures is a possibility. This is a general principle applicable to all international classifications: The Central Product Classification (CPC), for example, has a long established practice in this sense.

22. Such alternative structures can take different forms. They can be:

- (a) rearrangements of all COICOP categories, or of a subset of categories, into a new structure that still preserves the original detailed categories as building blocks;  
or
- (b) expansions of certain areas of interest for sectoral purpose beyond the detail provided in the published classification.

23. Due to the fact that the expenditure of households on food represents the highest portion of household expenditure in many countries, and that more detail is often needed at the national level for food security monitoring and policy interventions, an extension to a six-digit level is provided for Division 01 as an official annex to COICOP 2018. This Annex 1 can be used as a guideline for countries to further extend Division 01 in their national versions and to compare consumption data coming from other sources, such as food and nutrition surveys, when there is a need for detailed information on food and non-alcoholic beverages. This level was developed by the Food and Agriculture Organization of the United Nations (FAO) and includes 269 six-digit codes to supplement the Subclass structure.

## **G. Units of classification**

24. For the household consumption expenditures in Divisions 01 through 13, the units of classification are consumption expenditures made by households for satisfying their needs or wants for various goods and services. The basic data on consumption expenditure usually come from one or more of the following sources: household budget surveys, statistics on retail trade sales, and product flow estimates which involve allocating the total supply of goods and services to intermediate and final uses. The important point to note is that the units of classification are expenditures on specific goods and services – they are not expenditures on purposes as such. Divisions 01 to 13 of COICOP 2018 convert these basic statistics into a purpose classification by grouping together the expenditure on various goods and services that are deemed to fulfil particular purposes, such as nourishing the body, protecting it against inclement weather, preventing and curing illness, acquiring knowledge, travelling from one place to another.

25. The units of classification for COICOP 2018 Division 14 are the same as for COPNI. In principle, COPNI classifies individual outlays of NPISH according to the purpose they serve.

26. The units of classification for COICOP 2018 Division 15 are the same as for COFOG. The units of classification are, in principle, individual transactions. This means that each purchase, wage payment, transfer, loan disbursement or other outlay should be assigned a COFOG code according to the function that the transaction serves.

## II. Underlying principles of the classification

### A. Conceptual basis of COICOP

27. The 2008 SNA (para. 9.81) defines household actual consumption as consisting of three components:

- (a) households' final consumption expenditure;
- (b) government units' expenditure on consumption goods and services provided to households as social transfer in kind; and
- (c) NPISHs' expenditure on consumption goods and services provided to households as social transfer in kind.

28. "Household final consumption expenditure" is defined in 2008 SNA (para. 9.56). It includes the expenditures on goods and services purchased for final use by the household plus the estimated or imputed value of barter transactions, goods and services received in kind and goods and services produced and consumed by the same household. Household final consumption expenditure includes the consumption expenditures of the resident households, whether the expenditure takes place in the country or abroad. The treatment of the different types of goods and services that enter into household final consumption expenditure is explained in more details in the following paragraphs.

### B. Types of products

29. Most classes and subclasses comprise either goods or services. Classes and subclasses containing goods are denoted by "ND", "SD" or "D" indicating non-durable, semi-durable or durable respectively. "S" denotes classes or subclasses consisting of services.

30. The distinction between non-durable and durable goods is based on whether the goods can be used only once, or repeatedly or continuously over a period of considerably more than one year (para. 9.42 of 2008 SNA). Moreover, durables, such as motor cars, refrigerators, washing machines and television sets, have a relatively high purchasers' price. Semi-durable goods differ from durable goods in that their expected lifetime of use, though more than one year, is often significantly shorter and their purchase prices are substantially less.

31. Although a systematic separation between goods and services was carried out in this revision of COICOP, some classes and subclasses contain both because it is difficult for practical reasons to break them down into goods and services. Such classes and subclasses are usually assigned an "S", as the service component is considered to be predominant. Similarly, there are classes that contain either both non-durable and semi-durable goods, or both semi-durable and durable goods. Again, such classes and subclasses are assigned an "ND", "SD" or "D" according to which type of good is considered to be predominant.

### C. Imputed transaction values

32. The SNA records the exchange of goods, services and assets between institutional units in the form of transactions. Typically, transactions are carried out through the exchange of money and products. However, many goods or services are not actually sold but are nevertheless supplied to other units: for example, they may be bartered for other goods or services or provided free as transfers in kind. In other

cases, there is an implicit exchange of services which are recorded as transactions even though no money was exchanged. The transactions of such goods and services must also be included in the accounts even though their value has to be estimated.

33. Thus, estimates and imputations are needed in order to be able to record transactions not disposed of in monetary transactions with other units. Such estimates and imputations should not be interpreted as introducing hypothetical activities or flows of goods and services into the SNA. Their purpose is the opposite, namely, to capture in the accounts major flows of goods and services actually taking place in the economy that would otherwise be omitted. Strictly speaking, the imputation refers to the value of goods or services involved and not to the expenditure itself. In other words, it is the valuation that is imputed, not the fact that the transaction takes place.

34. Transactions that are not directly observable, e.g. from household income and expenditure surveys, and need to be estimated are own account production of goods for own final consumption, income in kind in the form of goods or services provided free of charge or at very low prices to households by government and NPISHs, services provided by financial intermediaries which are measured indirectly in the SNA and the production of housing services for their own final consumption by owner occupiers. These imputed values of household consumption expenditure are not directly observable from household income and expenditure surveys.

35. The production of housing services for their own final consumption by owner occupiers has always been included within the SNA production boundary, although it constitutes an exception to the general exclusion of own-account service production. The ratio of owner-occupied to rented dwellings can vary significantly between countries, between regions of a country and even over short periods of time within a single country or region, so that both international and inter-temporal comparisons of the production and consumption of housing services could be distorted if no imputation were made for the value of own-account housing services. The imputed value of the income generated by such production is taxed in some countries.

36. Persons who own the dwellings in which they live are treated as owning unincorporated enterprises that produce housing services that are consumed by the household to which the owner belongs. The housing services produced are deemed to be equal in value to the rentals that would be paid on the market for accommodation of the same size, quality and type. The imputed values of the housing services are recorded as final consumption expenditure of the owners.

37. Expenditures that owners, including owner-occupiers, incur on the decoration, minor repairs and maintenance of the dwelling that would normally be seen as the responsibility of a landlord should not be treated as household final consumption expenditure, but as intermediate expenditure incurred in the production of housing services. These expenditures may consist either of payments for services provided by professional builders or decorators or purchases of materials for “do-it-yourself” repairs and decoration.

38. Financial services may be paid for explicitly or implicitly and some transactions in financial assets may involve both explicit and implicit charges. There are four main ways in which financial services are provided and charged for:

- (a) Financial services provided in return for explicit charges. Expenditures on services for which financial institutions do make charges are recorded in the usual way.
- (b) Financial services provided in association with interest charges on loans and deposits. These sorts of services are known as financial intermediation services indirectly measured (FISIM) and are calculated as the difference between the actual bank interest receivable and the SNA interest receivable by financial

corporations on the loans they issue, and the difference between SNA interest payable and the actual bank interest payable by financial corporations on the deposits of their customers.

- (c) Financial services associated with the acquisition and disposal of financial assets and liabilities in financial markets. When households acquire or dispose of foreign exchange and some other financial assets, the dealer in the financial asset will typically quote a buying price and a selling price for the asset. The difference between the price actually receivable or payable and the average of the buying and selling price at the time of the transaction is also treated as expenditure on the services of financial institutions.
- (d) Financial services associated with insurance and pension schemes. Service charges for insurance are classified by type of insurance, namely: life insurance and non-life insurance. The service charge for non-life insurance is estimated as total premiums earned plus investment income earned from investing the premiums less adjusted claims incurred. The service charge for life insurance is estimated as premiums earned plus investment income earned from investing the premiums less benefits due less increases (plus decreases) in life insurance technical reserves. The indirect service charges of pension fund services are estimated as the excess of the investment income receivable by the schemes less the amount added to the reserves to meet present and future pension entitlements.

## **D. “Do it yourself” repairs and maintenance to consumer durables and dwellings**

39. “Do it yourself” repairs and maintenance to consumer durables and dwellings carried out by members of the household constitute the production of services for own final use. The production of services for own final use is excluded from the production boundary of the SNA and therefore also from consumption expenditure. However, the materials purchased for repair and maintenance are treated as final consumption expenditure (para. 6.36 of 2008 SNA) and are therefore included in COICOP.

40. In relation to dwellings, “do it yourself” activities cover decoration, maintenance and small repairs, including repairs to fittings, of types that are commonly carried out by tenants as well as by owners (para. 6.37 of 2008 SNA). The expenditure to purchase materials to undertake these activities are included in COICOP. On the other hand, more substantial repairs, such as re-plastering walls or repairing roofs, carried out by owners, are essentially intermediate inputs into the production of housing services; the production of such repairs by an owner-occupier is a secondary activity of the owner in his capacity as a producer of housing services. The purchases of materials for repairs in these cases are intermediate expenditures incurred in the production of housing services and are out of scope of COICOP.

## **E. Multi-purpose goods and services**

41. The majority of goods and services can be unambiguously assigned to a single purpose. However, some goods and services could plausibly be assigned to more than one purpose. Examples include:

- motor fuel which may be used to power vehicles classified as transport as well as vehicles classified as recreational;
- bicycles which may be purchased for transport or recreation purposes.

42. The general rule followed has been to assign multi-purpose goods and services to the division that represents the predominant purpose. Hence, motor fuel is shown under the Transport division.

43. Where the predominant purpose varies among countries, multi-purpose items have been assigned to the division that represents the main purpose in the countries where the item concerned is of greatest importance. As a result, bicycles are assigned to Division 07 (Transport), since transport is its usual function in the regions where most bicycles are purchased, that is to say Africa, South-East Asia, China and the non-mountainous countries of Europe.

44. Other examples of multi-purpose items and their treatment include:

- camper vans which are shown under Recreation, sport and culture (09) and not under Transport (07);
- basketball shoes and other sports footwear suitable for everyday or leisure wear are shown under Clothing and footwear (03) and not under Recreation, sport and culture (09).

## **F. Bundled goods and services**

45. Single expenditure outlays (i.e. where there is no itemized price information for the individual goods or services) may sometimes comprise a bundle of goods and services that serve two or more different purposes. For example, the purchase of:

- telecommunications bundles including a combination of home telephone, mobile phone, Internet and television services as well as mobile phone(s) (good);
- all-inclusive package tours including payment for transport, accommodation and catering services;
- education services that include payments for health care, transport, accommodation, board, educational materials, etc.;
- in-patient hospital services that include payments for medical treatment, accommodation and catering; and
- transport services that include meals and accommodation in the ticket price (e.g. passenger air transport).

46. Single outlays covering two or more purposes and not separately invoiced are dealt with on a case-by-case basis with the objective of obtaining a purpose breakdown that is as precise as possible and consistent with practical considerations of data availability. Hence, there is no attempt to isolate expenditure values related to separate purposes for telecommunication bundles, package tours, in-patient hospital services or transport services with accommodation and catering included in the single price. In all of these cases, the outlay should be categorized with the predominant good or service. However, specific classes for the above-mentioned bundles are also included in COICOP 2018.

47. Health care, transport, accommodation, board and educational materials linked with education, on the other hand, should be allocated as far as possible to Health (06), Transport (07), Recreation, sport and culture (09), and Restaurants and accommodation services (11).

## **G. Internet-enabled and other virtual services**

48. The Internet has enabled services, such as the streaming of movies and music, and subscriptions to games, thus removing the need for a physical product to be purchased and in many cases facilitating the rental of these products rather than outright purchase. For this reason, these services are in general classified with more traditional forms of the rental of similar goods.

49. While related products can exist in either physical or virtual forms (e.g. books, music, videos, games), in COICOP the product should be categorized in the one class based on predominant purpose. Therefore, the purchase of virtual books (e.g. e-books, audiobooks) should be classified in the same class or subclass as paper books because they are consumed for the same purpose. As stated previously, this principle can impact the type of product (i.e. D, SD, ND or S) associated with that class.

50. Where the Internet is being used for the rental of a product, either in its physical or virtual form, this activity is still a service and not the purchase of a product. For example, subscription fees to play online games (i.e. streaming) are classified to 09.4.3.1 (Rental of games software and subscription to online games). The outright purchase of video game software, in its physical or virtual form, is classified to 09.2.1.1 (Video game computers, game consoles, game apps and software).

## **H. Software and apps**

51. Software is a set of instructions, data and associated documentation which tells a computer to perform certain tasks. The definition of software includes operating systems of computers, applications, database programs, and mobile apps.

52. The classification of software will be different if they are associated with the provision of a service to the household or not.

53. Examples of software that are not associated with the provision of a service to the household are operating systems, office suites, photo editors, computational programs, programming languages, database programs, and computer games. This type of software may be installed physically on the computer or provided via a local network or the Internet. The expenditure for software and apps that are not associated with the provision of a service is classified under 08.2.0.0 (Software) for regular software or under 09.2.1.1 (Video game computers, game consoles, game apps and software) for gaming software.

54. If the payment is actually not for the software but for an associated service which is provided with the help of the software or app, then this expenditure should be classified under the corresponding service. Examples include: the ordering of a car with a driver using a smartphone app and the subsequent payment for the taxi service through the app is classified under 07.3.2.2 (Passenger transport by taxi and hired car with driver) because the payment is for a transportation service. Likewise, the expenditure for a dating app should be classified under 13.9.0.9 (Other services n.e.c.) because the payment is for a dating service.

55. For bundles of hardware and software (e.g. a computer with preinstalled operating systems and software applications), the outlay should be classified with the predominant product, which normally is the hardware (e.g. the computer).

56. For bundles of goods and services (e.g., the subscriptions of an office suite which includes cloud storage services), the general rules for bundled goods and services apply (paras. 45 to 47).

57. Firmware is a special type of software that is embedded in a hardware device or equipment and provides the low-level program control for the device or equipment. Firmware can be found in appliances (e.g. refrigerators, ovens), communication equipment (e.g. mobile phones, tablets, routers), computers and peripherals (e.g. the bios of a computer, printers, DVD-Rom drives), entertainment devices (e.g. television sets, set-top boxes, amplifiers, DVD players, MP3 players, digital cameras), and transport equipment (e.g. the software controlling the on-board computers and sensors in a car). Being an integral part required for the functioning of the good, firmware is normally not sold or priced separately. Firmware updates, providing corrections or

new functions for the good, are often also provided free of charge. However, in some cases firmware updates are not free. The expenditure on firmware updates should be classified together with the expenditure for the good for which the firmware update is meant.

## **I. Treatment of second-hand goods**

58. Since second-hand goods are used for the same purpose as new goods, expenditure on second-hand goods are not classified separately from the original good in COICOP.

59. The only exception relates to second-hand motor vehicles for which a separate subclass was created because of the substantial market for these goods and the high value of these transactions. Although the full value is usually recorded for price statistics and other uses, it should be noted that only the trade margin on second-hand cars are part of household consumption expenditure and not the whole value of the car, except in cases where the vehicle previously belonged to businesses or government or was imported.

## **J. Treatment of rental and leasing**

### **Renting of land**

60. Rent is the income receivable by the owner of a natural resource, such as land (the lessor or landlord) for putting the natural resource at the disposal of another institutional unit (a lessee or tenant) for use of the natural resource (para. 7.109 of 2008 SNA). Rent is a form of property income (para. 7.107 of 2008 SNA), thus the payment by households for renting land alone is out of scope of COICOP and should be excluded. This is in line with the definition of consumption of goods and services (para. 9.39 of 2008 SNA): Consumption of goods and services is the act of completely using up the goods and services in a process of production or for the direct satisfaction of human needs or wants. Since the renting of land for parking lots, garden allotments or animals (e.g. horses) for recreational purposes does not consume the land, the related household expenditure on renting land is out of scope.

### **Rental services**

61. There are many categories in COICOP that relate to the “rental” or “hiring” of a product or service. Rental in this sense refers to expenditure on the service of renting or hiring a product or service that is owned by another party and is in scope of COICOP (e.g. rental or hiring of clothes or furniture). Note that the hiring of contractors to undertake substantial repairs to the dwelling is out of scope.

### **Leasing**

62. The SNA distinguishes between operating leases (para. 17.301 of 2008 SNA) and financial leases (para. 17.304 of 2008 SNA).

63. In the case of operating leases, the legal owner is also the economic owner, accepts operating risks and provides maintenance and repair of the asset. para. 17.302 of SNA 2008 states: “The payments made under an operating lease are referred to as rentals and are recorded as payments for a service.” Hence, this type of leasing is treated as rental.

64. In the case of financial leases, the legal owner transfers economic ownership to the lessee who accepts operating risks and undertakes repair and maintenance. Payments are not treated as rentals but as payment of interest and repayment of principal to the legal owner / lessor. Therefore, financial leasing of a good is classified as purchasing a good.

## **K. Ready-made meals (Division 01) and Take-away food services (Division 11)**

65. Ready-made meals have been added to Division 01 of COICOP 2018 due to the increasing availability of prepared meals. Ready-made meals are generally sold in supermarkets, where the meal can also be produced or prepared in some cases. Ready-made meals are commonly intended for consumption at home, where they can be eaten as they are or after heating, but without cooking. Also, when consumed at the supermarket or market premises, ready-made meals are still to be classified as goods in Division 01.

66. Services provided by restaurants, cafés and the like are classified in Division 11. Serving services range from full (with a waiter and seating) to limited and self-service. In contrast to ready-made meals in Division 01, the predominant component of services provided by restaurants, cafés and the like is the price paid for providing the serving and cooking service, which includes the goods such as the food and beverage for immediate consumption. Expenditure on such food and beverage serving services are to be classified in Division 11 even when food is purchased at the restaurant, and the like, and consumed at home. If food is purchased in a restaurant and home delivered, the expenditure for delivery is to be classified under Division 07, if separately invoiced. The criterion therefore to distinguish between Division 01 and Division 11 is not where the food is consumed (at home vs. away from home) but rather on the type of expenditure (for the good or for the serving service).

## **L. Dwelling, domestic and household services**

67. The services included under Division 04 (Housing, water, electricity, gas and other fuels) are those that enable the use of the dwelling (e.g. cleaning the road or footpath to provide access to the dwelling, chimney sweeping, snow removal). Services included under Division 05 (Furnishings, household equipment and routine household maintenance) relate to household maintenance or services that support households rather than the dwelling. Division 05 differentiates further between domestic and other household services. Domestic services by paid staff (05.6.2.1) are services provided by personnel employed by households, such as butlers, maids, cooks, nannies, governesses, cleaners, au pairs, gardeners) who receive a compensation or wage for their services. Domestic services also include services, such as babysitting, gardening and cleaning supplied by enterprises and self-employed persons. Other household services (05.6.2.9) are services provided by enterprises and self-employed persons that are not routinely provided by staff employed by households, such as carpet cleaning, pest extermination, and disinfection.

## **M. Housing (Division 04) and Accommodation Services (Group 11.2)**

68. COICOP uses the concepts of principal dwellings, secondary dwellings and vacation homes as defined in paras. 2.26 and 2.27 of the International Recommendations for Tourism Statistics (IRTS) 2008<sup>8</sup>, and provided below:

69. Principal dwelling – each household has a principal dwelling (sometimes also designated as main or primary home), usually defined with reference to time spent there, whose location defines the country of residence and place of usual residence of this household and all of its members. All other dwellings (owned or leased by the

household) are considered secondary dwellings (para. 2.26 of IRTS 2008). See also para. 29.89 of 2008 SNA.

70. Secondary dwelling – not all secondary dwellings are necessarily vacation homes. For example, if a family lives in a country area close to a city, with one household member working in the city centre and the household owns or leases a secondary dwelling in the city, both dwellings are considered part of the usual environment and are therefore not vacation homes.

71. In COICOP, expenditure related to the principal, or secondary dwellings is classified in Division 04 (Housing, water, electricity, gas and other fuels). Expenditure related to accommodation services away from the principle or secondary dwelling (excluding vacation homes), such as resorts, hotels, motels and vacation homes is classified to Group 11.2 (Accommodation services). Further explanation is provided in the relevant division and group descriptions.

## **N. Tips, gratuities, and unofficial payments**

72. Expenditure on tips, gratuities, and unofficial payments (in the following only called tips) are classified with the service to which the tipping relates. For example:

- tipping a maid for cleaning your hotel room: the tip is included with the expenditure for the accommodation service (i.e. in 11.2.0.1 Hotels, motels, inns and similar accommodation services);
- tipping waiters in a restaurant, the tip expenditure is included in 11.1.1.1 (Restaurants, cafes and the like – with full service); and
- tipping food delivery drivers: if the fee for delivery of the food is included in the cost of the food, this expenditure is included in Division 11. However, if the delivery of the food is undertaken by a different business or separately invoiced, the expenditure is included in 07.4.9.2 (Delivery of goods).

## **O. Gifts and donations**

73. Outlays on gifts or donations are recorded in the SNA as transfers and therefore out of scope for COICOP. On the other hand, goods or services obtained as gifts or donations are recorded in the SNA as household consumption expenditure by the receiving household. They are valued at the market value of the goods or services received. The costs of the expenditures are being met from transfers received as described above.

## **P. Delivery fees**

74. Throughout COICOP delivery fees are classified separately from the good being delivered, where this is possible (i.e. the delivery fee is separately invoiced). The need for this distinction arises from the SNA valuation principle which treats transport services separately invoiced as transport margins. The objective is to separate the cost of the delivery service from the cost of the product being delivered (para. 14.130 of 2008 SNA).

75. If the delivery and installation of a good are charged together, e.g. for furniture and appliances, then this bundle should be classified under the appropriate subclass for installation (05.1.2.0 for furniture, 05.3.3.0 for appliances), as the installation represents probably the higher value added.

## **Q. Other clarifications**

76. In a small number of situations, the logic for allocating goods or services to particular divisions is not immediately evident. For example:

- textbooks are classified in Division 09 (Recreation, sport and culture), rather than Division 10 (Education services);
- food consumed from a food service establishment (e.g. restaurant, café) is classified in Division 11 (Restaurants and accommodation services), and not Division 01 (Food and non-alcoholic beverages).

77. These situations are not dealing with multi-purpose goods or services, but rather with the predominant purpose and type of product. Division 10 relates to education services only and therefore excludes expenditure on goods typically required to undertake education services (e.g. text books, school uniforms). Food consumed in food-service establishments commonly includes a service component (e.g. to prepare and serve a meal) and therefore is more appropriately classified to Division 11 which is predominately related to services.

### III. Application of COICOP – Explanatory notes and rules of interpretation

78. Explanatory notes provide supporting information about the classification category, assisting the user in determining its boundaries. Explanatory notes are available in each level of the COICOP.

79. In addition, examples of products that are included or excluded are listed to clarify ambiguous cases that might be difficult to classify. Whenever an exclusion statement is provided, it is accompanied by the cross-reference to the category where the product in question is classified. The order in which exclusions are presented does not indicate a ranking by importance, they are sorted by cross-referenced codes in numerical order.

80. Items listed under “Includes also” are a list of borderline cases, which belong to the described category.

81. It should be noted that the explanatory notes are not intended to present an exhaustive list of all the products under each heading; they should be regarded only as lists of examples to illustrate the content. Consequently, users may need further guidance from the United Nations Statistics Division (UNSD) on the interpretation of the exact content of COICOP categories.

82. Users should be aware that the explanatory notes of the COICOP are developed for statistical purposes, in many cases they are the results of choices made by statisticians following some conventions that may be valid in their domains but that may not apply for other purposes.

83. New products or products with special characteristics may not be explicitly described in the explanatory notes. If guidance is needed, users are invited to contact UNSD to clarify where these products should be classified. Special rulings may be issued that clarify the treatment of specific products in the classification and will be made available on the United Nations Classifications website<sup>9</sup>.

## IV. Relationships to other classifications

### Relation to COPNI, COPP, COFOG

84. COICOP 2018 is divided into three parts:

Divisions 01 to 13 Individual consumption expenditure of households;

Division 14 Individual consumption expenditure of NPISH;

Division 15 Individual consumption expenditure of general government.

85. The purpose breakdowns within Divisions 14 and 15 of COICOP 2018 replicate the purposes in the classifications for NPISH in COPNI and general government in COFOG. Thus, once the consumption expenditures of NPISHs and general government have been classified according to COPNI and COFOG, the individual consumption expenditures in these two classifications can be transferred directly into Divisions 14 and 15 of COICOP 2018.

### Relation to CPC

86. The Central Product Classification (CPC) is closely linked with COICOP, since expenditures on products are the basic building blocks of COICOP classes, and correspondences can be established between categories in the two classifications.

### Relation to ISCED

87. The International Standard Classification of Education (ISCED 2011) of the United Nations Educational, Scientific and Cultural Organization (UNESCO) is used to define the breakdown of educational services in Division 10 (Education). The content of Division 10 was modified to better align it with ISCED 2011.

### Relation to ICHA

88. Division 06 (Health) was considerably revised to improve the consistency of COICOP 2018 with the International classification for health accounts (ICHA). This will allow the reconciliation of health accounting with the SNA and its accompanying classifications.

## **V. Using COICOP for establishing national classifications of individual consumption according to purpose**

89. As an international standard classification, COICOP is the primary tool for collecting and presenting internationally comparable statistics on individual consumption according to purpose. It is therefore of great importance that at the national level data are collected using classifications that are compatible with COICOP.

90. Countries may choose to either use COICOP directly for their national purposes or to develop their own national classification. Indeed, the need for international comparability does not imply that countries must adopt COICOP as it is, without modification. Countries can use COICOP as a guide in adapting their national classifications to the international standard. Wherever countries lack the infrastructure required to develop and maintain their own individual consumption classification, they may adopt COICOP as their national classification with little or no modification. This is often done by extending or collapsing the detail of COICOP while maintaining its general structure. Other countries may have historically developed a classification that suits their particular needs. Those countries should make efforts to adapt their classification in a way that allows for the provision of data according to COICOP without substantial loss of information e.g. through developing correspondence tables.

91. For a national classification to be compatible with COICOP, the most detailed categories of the classification in the national scheme should either coincide with, or be aggregations of, or dissections of the individual subclasses of COICOP. In other words, each of the most detailed categories of the national classification should either (1) have the same scope as a COICOP subclass, (2) be a subset of a COICOP subclass, or (3) be composed of two or more complete COICOP subclasses, preferably from the same COICOP class. The first two options are the preferred methods, as they provide the maximum opportunity for international data comparability at the detailed level of the COICOP, while the third option allows for comparability at a more aggregated level only. Provided these requirements are met, the compatibility of the national classification with COICOP would not necessarily be affected by its structure or the position of the categories at its most detailed level.

92. If additional detail is desired, expanded classifications based on COICOP may be constructed by subdividing each subclass into as many as nine (or more, if needed) subcategories. This may be done by appending one (or more, if needed) decimal place to the COICOP five-digit code. Alternatively, the subdivision of classes into subclasses in COICOP may, in some cases, be expanded by replacing the subclasses in a given class with a greater number of more detailed categories at the five-digit level.

93. Some countries may need to reduce the level of COICOP detail in their national classifications. Some COICOP categories may be relatively unimportant in certain countries while data concerning other COICOP categories may simply be unavailable. They may find it more appropriate to combine some, or all, of the subclasses or classes in each of these divisions into single categories at the most detailed level of their classification. In so doing, one should take into account the principles described in para. 91 above.

94. During the revision of COICOP the need for increased detail for food goods was identified. At the same time, it was decided not to include all the desired detail in the main structure of COICOP but to provide users with an option to use an extended version of Division 01. If countries need to add more detail to Division 01, it is

## VI. History of the COICOP 2018 revision

95. Although the formal revision process of the COICOP started in 2015, the idea of revising this classification was raised for the first time in 2011 in the United Nations Expert Group on International Statistical Classifications meeting. The revision work was carried out in three distinct phases; the first two phases represented the preliminary work that led to the decision to revise COICOP 1999.

### **Phase 1 (2011-2013): Proposal to revise COICOP and first global consultation**

96. A proposal to revise the COICOP 1999 was presented at the meeting of the United Nations Expert Group on International Statistical Classifications in 2011. The proposal was based on issues related to the application of COICOP 1999 raised during previous Expert Group meetings and classification workshops. The Expert Group acknowledged the need for clarification and improvement of COICOP 1999 but also noted that a revision of this classification might have possible implications on the other “purpose classifications” used in the SNA.

97. Considering that the SNA, at that time, had just been revised, it was decided that, before launching any formal revision, a global consultation should first be conducted in order to assess the need and scope for such a revision. A Technical Subgroup (TSG-COICOP) was formed to look at the issues raised in the global consultation and to evaluate whether a revision was needed.

98. The global consultation was carried out between October and December 2012, resulting in more than 70 responses from countries and international organizations. The results showed that countries were generally in favour of an update or revision of COICOP 1999, to ensure that it continues to provide an adequate tool for the recording of households’ consumption expenditures. In particular, it was concluded that a revision was needed to reflect the significant changes in goods and services in some areas: for example, new products had emerged in some areas of household consumption (mainly in Divisions 08 and 09), while some products had disappeared from the market.

### **Phase 2 (2013-2015): Clarification of issues raised during the first global consultation**

99. Preliminary results from the global consultation were presented and discussed during the United Nations Expert Group meeting in 2013. The TSG-COICOP identified three main groups of issues: issues which would imply a change in COICOP; issues which could be solved by case laws but ideally by a change in structure; and issues which could be solved by case laws.

100. The TSG-COICOP prepared clarifications on all issues and presented its report at the 2015 Expert Group meeting, also recommending to launch a full revision of the COICOP as there were enough and sufficiently important requests for change.

101. Concerning the other purpose classifications in the SNA, it was decided that the COICOP should be revised first and that an impact assessment on COFOG, COPNI and COPP should be conducted.

### **Phase 3 (2016-2018): Drafting the revised COICOP**

102. In March 2016 the TSG-COICOP drafted a first proposal for a new revised structure of COICOP using the issues raised during the first global consultation as a starting point. In addition, the TSG also aimed at a better separation of goods and

services, and introduced an additional level of detail that would better serve the various uses of COICOP in different statistical domains.

103. A global consultation on this draft was carried out between September and November of 2016, resulting in responses from more than 100 countries and organizations. In addition, special expertise on selected areas was provided by specialized agencies, such as the FAO, the UNESCO and the WHO. Based on the feedback received, the TSG-COICOP updated the draft classification.

104. In September 2017, the United Nations Expert Group reviewed and endorsed the draft of the revised COICOP. Documents explaining the main changes to the classification and detailing the TSG's decisions regarding the feedback received from the countries and international organizations are available on the meeting website.

105. In March 2018, the 49<sup>th</sup> Session of the United Nations Statistical Commission endorsed the revised COICOP classification – COICOP 2018.

## Part Three

### **Detailed structure and explanatory notes**

## 01 FOOD AND NON-ALCOHOLIC BEVERAGES

Division 01 covers food (01.1) and non-alcoholic beverages (01.2) purchased by the household mainly for consumption or preparation at home. It excludes food and non-alcoholic beverages that are provided as part of a food serving service (Division 11).

Services for processing primary goods to produce food and non-alcoholic beverages for own consumption are also included in this Division (01.3).

Food is composed of all edible goods that are purchased and consumed by the household with the purpose of nourishing. It includes: cereals and cereal products; meat; fish and other seafood; milk, other dairy products and eggs; oils and fats; fruit and nuts; vegetables, tubers, plantains, cooking bananas and pulses; sugar, confectionery and desserts; salt, sauces and condiments, spices and culinary herbs and seeds.

Division 01 also includes baby food and ready-made food that can be eaten as it is or after heating. Non-alcoholic beverages include drinks that do not contain any alcohol.

### 01.1 FOOD

Food purchased by the household mainly for consumption or preparation at home. It excludes food that is provided as part of a food serving service.

Food is composed of all edible goods that are purchased and consumed by the household with the purpose of nourishing. It includes: cereals and cereal products; meat; fish and other seafood; milk, other dairy products and eggs; oils and fats; fruit and nuts; vegetables, tubers, plantains, cooking bananas and pulses; sugar, confectionery and desserts; salt, sauces and condiments, spices and culinary herbs and seeds.

Includes:

- products that need to be cooked and further prepared as well as ready-made food.

*Excludes:*

- *local delivery services of food or drinks, when separately invoiced (07.4.9.2);*
- *products for animal feeding (09.3.2.2);*
- *food provided by food serving services (Division 11).*

#### 01.1.1 Cereals and cereal products (ND)

##### 01.1.1.1 Cereals (ND)

Dried grains of cereals, whether or not broken or precooked (steamed), but not further prepared.

Includes:

- wheat;
- rice, including parboiled rice;
- sorghum;
- barley;
- millet;

- maize (corn);
- quinoa;
- teff;

Includes also:

- bulgur;
- rye;
- oats;
- triticale;
- buckwheat;
- canary seed;
- quihuicha or Inca wheat;
- canagua or coaihua;
- adlay or Job's tears;
- mixed cereal grains, in the form of dried grains, also including other ingredients (provided that these are not the main ingredient) but not further processed.

Excludes:

- *flour of cereals (01.1.1.2);*
- *breakfast cereals (01.1.1.4);*
- *ready-made preparations based on cereals, such as ready-made soups based on cereals (01.1.9.1);*
- *baby rice cereals and other baby cereals (01.1.9.2);*
- *seeds for planting (09.3.1.2).*

#### **01.1.1.2 Flour of cereals (ND)**

Flour of cereals mentioned in Subclass 01.1.1.1 whether instant (precooked – steamed – or added with yeasts) or not.

Includes:

- flour of cereals mentioned in Subclass 01.1.1.1.

Includes also:

- instant flour for bakery products added with yeasts;
- polenta flour, whether instant (pre-steamed) or not.

Excludes:

- *flour as baby food, baby rice cereals and other baby cereals (01.1.9.2).*

#### **01.1.1.3 Bread and bakery products (ND)**

Includes:

- bread and bread rolls;
- crisp bread, rusks, toasted bread, crackers;
- tortillas;
- injera;
- pizza bases without topping, whether pre-cooked or not;
- gingerbread and the like;
- sweet biscuits (cookies);
- waffles and wafers;
- ice cream cones;
- crumpets, muffins, croissants, cakes, sweet tarts, sweet pies, and other pastry goods and cakes.

*Excludes:*

- *pizza (with topping), quiche, meat or fish pies (01.1.9.1).*

#### **01.1.1.4 Breakfast cereals (ND)**

*Includes:*

- cornflakes, oatmeal and oat flakes, muesli, granola, puffed cereals including puffed rice cakes;
- breakfast cereals with nuts or dried fruit.

*Excludes:*

- *popcorn (1.1.1.9).*

#### **01.1.1.5 Macaroni, noodles, couscous and similar pasta products (ND)**

*Includes:*

- pasta uncooked, whether stuffed or not, and couscous;
- uncooked dumplings, ravioli and similar.

*Excludes:*

- *bulgur (01.1.1.1);*
- *prepared dishes containing stuffed pasta; prepared couscous dishes (01.1.9.1).*

#### **01.1.1.9 Other cereal and grain mill products (ND)**

*Includes:*

- mixes and doughs for the preparation of bakery products;
- popcorn;
- granola bars;
- malt; malt extract;
- chips and crisps of cereals.

*Includes also:*

- seitan and other meat substitutes made from cereals.

*Excludes:*

- *soy meat and burgers, veggie burgers, tofu, tempeh and other meat substitutes made from vegetables and nuts; potato starch, tapioca, sago and other starches (01.1.7.9);*
- *ready-made preparations based on cereals, such as ready-made soups based on cereals (01.1.9.1).*

#### **01.1.2 Live animals, meat and other parts of slaughtered land animals (ND)**

##### **01.1.2.1 Live land animals (ND)**

Live land animals, both domestic and wild, for food purpose.

*Includes:*

- cattle (cow, veal, common ox, zebu or humped ox, watussi ox, gaur, gayal, banteng, Tibetan yak);

- buffaloes (Indian or water buffaloes, Asiatic buffalo or arni, Celebese anoa or pigmy buffaloes, African buffaloes, such as the dwarf buffaloes and the large Caffrarian buffaloes, the American bison or “buffalo” and the European bison, the “beefalo” (a cross between a bison and a domestic beef animal);
- pigs;
- oats, lambs and sheep;
- poultry (chicken, ducks, geese, turkeys and guinea fowl);
- hares and rabbits;
- horses, donkeys and other equines;
- camels, dromedaries, alpaca, llama, guanaco, vicuña and other camelids;
- ostriches, emus, rhea, pheasant, grouse, pigeon, quail and other birds;
- snakes and other reptiles;
- spiders, scorpions, and other insects and worms;
- terrestrial snails;
- frogs.

*Excludes:*

- *live fish (01.1.3.1);*
- *other live seafood (01.1.3.4);*
- *live animals for transport (07.1.4.0);*
- *live animals for recreation (09.1.2.4).*

#### **01.1.2.2 Meat, fresh, chilled or frozen (ND)**

Meat of all animals, both domestic and wild, fresh, chilled or frozen.

*Includes:*

- meat of cattle (cow, veal, common ox, zebu or humped ox, watussi ox, gaur, gayal, banteng, Tibetan yak);
- meat of buffaloes (Indian or water buffaloes, Asiatic buffalo or arni, Celebese anoa or pigmy buffaloes, African buffaloes, such as the dwarf buffaloes and the large Caffrarian buffaloes, the American bison or “buffalo” and the European bison, the “beefalo” (a cross between a bison and a domestic beef animal);
- meat of pigs;
- meat of oats, lambs and sheep;
- meat of poultry, (chicken, ducks, geese, turkeys and guinea fowl);
- meat of hares and rabbits;
- meat of horses, donkeys and other equines;
- meat of camels, dromedaries, alpaca, llama, guanaco, vicuña and other camelids;
- meat of seals, walruses, whales and other marine mammals;
- meat of antelopes, deer, boars, kangaroos;
- meat of ostriches, emus, rhea, pheasant, grouse, pigeon, quail and other birds;
- meat of snakes, alligators and other reptiles;
- spiders, scorpions, insects, and worms;
- terrestrial snails;
- frogs.

*Includes also:*

- minced meat of animals above.

#### **01.1.2.3 Meat, dried, salted, in brine or smoked (ND)**

Meat of all animals, dried, salted, in brine or smoked.

*Includes:*

- bacon, ham, salami.

*Excludes:*

- *pâté (01.1.2.5).*

#### **01.1.2.4 Offal, blood and other parts of slaughtered animals, fresh, chilled or frozen, dried, salted, in brine or smoked (ND)**

Offal and other parts of slaughtered animals fresh, chilled or frozen, dried, salted, in brine or smoked.

*Includes:*

- bones;
- pork heads, tails and ears; chicken feet.

*Excludes:*

- *offal, blood, and other parts of slaughtered animals' preparations (01.1.2.5).*

#### **01.1.2.5 Meat, offal, blood and other parts of slaughtered animals' preparations (ND)**

Meat, offal or blood preparations, whether frozen or not.

*Includes:*

- sausages and similar products of meat, offal or blood;
- marinated meat;
- canned meat, meat extracts, meat juices;
- minced meat mix, from different types of meat;
- all kind of pâté, including liver pâté;
- breaded meat;
- other preparations of meat, meat offal or blood.

#### **01.1.3 Fish and other seafood (ND)**

Fish and other seafood, harvested or farmed in fresh and marine waters, such as crustaceans, molluscs and other aquatic invertebrates, as whole or part of (i.e. cuts, fillets, meat, minced or not), including livers, roes, fins, meal and other offal.

*Includes:*

- aquatic turtles;
- other edible aquatic invertebrates and animals, such as sea cucumbers, sea urchins, sea squirts, and jellyfish.

*Excludes:*

- *marine mammals, frogs and terrestrial snails (01.1.2.1, 01.1.2.2, 01.1.2.3);*
- *seaweeds and other aquatic plants (01.1.7.4).*

##### **01.1.3.1 Fish, live, fresh, chilled or frozen (ND)**

Fish, live, fresh, chilled or frozen.

*Includes:*

- fish, live for food purpose;

- fish, fresh, chilled or frozen;
- fish fillets and meat, minced or not, fresh, chilled or frozen.

*Excludes:*

- *livers, roes, fins and other offal (01.1.3.7).*

#### **01.1.3.2 Fish, dried, salted, in brine or smoked (ND)**

Fish, dried, salted or in brine; smoked.

*Includes:*

- fish fillets and meat, dried, salted or in brine; smoked.

*Excludes:*

- *livers, roes, fins and other offal (01.1.3.7).*

#### **01.1.3.3 Fish preparations (ND)**

Prepared foodstuffs made of fish, whether frozen or not.

*Includes:*

- fillets merely covered with batter or bread crumbs, whether or not frozen;
- crabmeat and surimi.

*Excludes:*

- *caviar and caviar substitutes and prepared and preserved shark fins; livers, roes, fins and other offal (01.1.3.7).*

#### **01.1.3.4 Other seafood, live, fresh, chilled or frozen (ND)**

*Includes:*

- crabs, lobsters, crayfish, krill, sea-spider, shrimps and prawns and other crustaceans, live, fresh, chilled or frozen;
- cuttlefish, squid, octopus, sea snails, abalone and bivalves, such as oysters, scallops, mussels, clams, cockles and ark shells and other molluscs, live, fresh, chilled or frozen;
- sea urchins, sea cucumbers (*bêches de mer*) and jellyfish and other aquatic invertebrates, live, fresh, chilled or frozen.

*Excludes:*

- *terrestrial molluscs, including terrestrial snails live, fresh, chilled or frozen (01.1.2.1, 01.1.2.2, 01.1.2.3);*
- *seaweeds and other edible aquatic plants (01.1.7.4).*

## 03 CLOTHING AND FOOTWEAR

Division 03 covers all clothing materials, garments, articles and accessories (03.1), footwear (03.2), and related services including cleaning, repair and hire of clothing (03.1.4.) and footwear (03.2.2). The purchase of second-hand clothing and footwear should be included in the same classes as the new articles as the purpose is the same. Unisex garments and footwear should be classified according to the gender of the person wearing them.

Division 03 excludes sport-and game-specific sports- and footwear (09.2.2.1).

### 03.1 CLOTHING

The clothing classified in this group covers materials purchased to be transformed into clothing, garments and accessories and services related to clothing.

Made-to-measure refers to the service of providing custom fitted clothing when the retailer supplies all of the materials and is included in Group 03.1.2 (Garments) as the cost of the garment usually outweighs the cost of the service. Tailoring refers to creating clothing garments where the main material is supplied by the customer and is classified in Group 03.1.4 (Cleaning, repair, tailoring and hire of clothing) as the service is the higher expenditure.

#### 03.1.1 Clothing materials (SD)

Includes:

- clothing materials of natural fibres, of synthetic fibres and of their mixtures;
- leather, fur, fusible webbing, wadding and felt filling for making wearing apparel.

Excludes:

- *furnishing fabrics (05.2.1.1).*

#### 03.1.1.0 Clothing materials (SD)

## 04 HOUSING, WATER, ELECTRICITY, GAS AND OTHER FUELS

Division 04 covers goods and services for the use of the house or dwelling, its maintenance and repair, the supply of water and miscellaneous services related to the dwelling and energy used for heating or cooling. Actual rentals and imputed rentals (according to national accounts (SNA 2008)) for main or secondary residences are classified in Groups 04.1 and 04.2, respectively.

Maintenance, repair and security of the dwelling include materials for repair purchased with the intention of undertaking the repair and maintenance themselves, as well as the repair services purchased from enterprises. It should be noted that only expenditures on materials and services for minor repairs are covered by Group 04.3. Expenditures on materials and services for major maintenance and repair are not part of individual consumption expenditures of households and are thus out of scope of the classification. This refers especially to owner-occupiers; tenants will not make such expenditures on major maintenance and repair at all as they are not the owner of the dwelling.

### 04.1 ACTUAL RENTALS FOR HOUSING

Rentals normally include payment for the use of the land on which the property stands, the dwelling occupied, the fixtures and fittings for heating, plumbing, lighting, etc., and, in the case of a dwelling let furnished, the furniture.

Rentals also include payment for the use of a garage to provide parking in connection with the dwelling.

The garage does not have to be physically contiguous to the dwelling; nor does it have to be leased from the same landlord.

Rentals do not include payment for the use of garages or parking spaces not providing parking in connection with the dwelling (07.2.4). Nor do they include charges for water supply (04.4.1), refuse collection (04.4.2) and sewage collection (04.4.3); co-proprietor charges for caretaking, gardening, stairwell cleaning, heating and lighting, maintenance of lifts and refuse disposal chutes, etc. in multi-occupied buildings (04.4.4); charges for electricity (04.5.1) and gas (04.5.2); charges for heating and hot water supplied by district heating plants (04.5.5).

Each household has a principal dwelling (sometimes also designated as main or primary home), usually defined with reference to time spent there, whose location defines the country of residence and place of usual residence of this household and of all its members. All other dwellings (owned or leased by the household) are considered secondary dwellings.

Includes:

- rentals actually paid by tenants or subtenants occupying unfurnished or furnished premises as their main residence.

Includes also:

- payments by households occupying a room in a hotel or boarding house as their main residence.

Excludes:

- accommodation services of educational establishments and hostels (11.2.0.9);
- retirement homes for elderly persons (13.3.0.2).

#### 04.1.1 Actual rentals paid by tenants for main residence (S)

Includes:

- rentals actually paid by tenants or subtenants occupying unfurnished or furnished premises as their main residence.

Includes also:

- payments by households occupying a room in a hotel or boarding house as their main residence.

*Excludes:*

- *garage rentals to provide parking and storage in connection with the dwelling (04.1.2.2);*
- *accommodation services of educational establishments and hostels (11.2.0.9);*
- *retirement homes for elderly persons (13.3.0.2).*

#### **04.1.1.0 Actual rentals paid by tenants for main residence (S)**

Includes:

- rentals actually paid by tenants or subtenants occupying unfurnished or furnished premises as their main residence.

Includes also:

- payments by households occupying a room in a hotel or boarding house as their main residence.

*Excludes:*

- *garage rentals to provide parking and storage in connection with the dwelling (04.1.2.2);*
- *accommodation services of educational establishments and hostels (11.2.0.9);*
- *retirement homes for elderly persons (13.3.0.2).*

#### **04.1.2 Other actual rentals (S)**

Includes:

- rentals actually paid for secondary residences;
- rentals of self-storage units;
- garage rentals.

*Excludes:*

- *accommodation services of holiday villages and holiday centres (11.2.0.2).*

##### **04.1.2.1 Actual rentals paid by tenants for secondary residences (S)**

Includes:

- rentals actually paid for secondary residences.

*Excludes:*

- *accommodation services of holiday villages and holiday centres (11.2.0.2).*

##### **04.1.2.2 Garage rentals and other rentals paid by tenants (S)**

Rental payments for the use of a garage to provide parking and storage in connection with the dwelling. The garage or storage does not have to be physically contiguous to the dwelling, nor does it have to be leased from the same landlord.

Includes:

- garage rentals in connection with the dwelling;
- rentals of self-storage units.

*Excludes:*

- *payment for the use of garages or parking spaces not providing parking in connection with the dwelling (07.2.4.1);*
- *(long-term) storage of furniture and other personal effects (07.4.9.1).*

## **04.2 IMPUTED RENTALS FOR HOUSING**

Persons who own the dwellings in which they live are treated as owning unincorporated enterprises that produce housing services that are consumed by the household to which the owner belongs. The housing services produced are deemed to be equal in value to the rentals that would be paid on the market for accommodation of the same size, quality and type. The imputed values of the housing services are recorded as final consumption expenditures of the owners. Imputed rentals normally include value for the use of the land on which the property stands, the dwelling occupied, and the fixtures and fittings for heating, plumbing, lighting, etc.

Imputed rentals also include the use of a garage to provide parking in connection with the dwelling. The garage does not have to be physically contiguous to the dwelling.

Imputed rentals do not include payment for the use of garages or parking spaces not providing parking in connection with the dwelling (07.2.4). Nor do they include charges for water supply (04.4.1), refuse collection (04.4.2) and sewage collection (04.4.3); co-proprietor charges for caretaking, gardening, stairwell cleaning, heating and lighting, maintenance of lifts and refuse disposal chutes, etc. in multi-occupied buildings (04.4.4); charges for electricity (04.5.1) and gas (04.5.2); charges for heating and hot water supplied by district heating plants (04.5.5).

### **04.2.1 Imputed rentals of owner-occupiers for main residence (S)**

*Includes:*

- imputed rentals of owners occupying their main residence.

#### **04.2.1.0 Imputed rentals of owner-occupiers for main residence (S)**

*Includes:*

- imputed rentals of owners occupying their main residence.

### **04.2.2 Other imputed rentals (S)**

*Includes:*

- imputed rentals for secondary residences;
- imputed garage rentals in connection with the dwelling;
- imputed rentals of storage units.

#### **04.2.2.0 Other imputed rentals (S)**

*Includes:*

- imputed rentals for secondary residences;
- imputed garage rentals in connection with the dwelling;
- imputed rentals of storage units.

## **04.3 MAINTENANCE, REPAIR AND SECURITY OF THE DWELLING**

Maintenance and repair of dwellings are distinguished by two features: first, they are activities that have to be undertaken regularly in order to maintain the dwelling in good working order; second, they do not change the dwelling's performance, capacity or expected service life.

There are two types of maintenance and repair of dwellings: those which are minor, such as interior decoration and repairs to fittings, and which are commonly carried out by both tenants and owner-occupiers; and those which are major, such as replastering walls or repairing roofs, and which are carried out by owners only.

Only expenditures which tenants and owner-occupiers incur on materials and services for interior decoration, minor maintenance and repair, that would normally be seen as the responsibility of a tenant, are part of individual consumption expenditure of households.

Expenditure that owners, including owner-occupiers, incur on the decoration, minor repairs and maintenance of the dwelling that would normally be seen as the responsibility of a landlord should not be treated as household final consumption expenditure. The same applies to expenditure which owner-occupiers incur on materials and services for major maintenance and repairs.

Purchases of materials made by tenants or owner-occupiers with the intention of undertaking the maintenance or repair themselves should be shown under Class 04.3.1. If tenants or owner-occupiers pay an enterprise to carry out the maintenance or repair, the total value of the service, including the costs of the materials used, should be shown under Class 04.3.2 unless the materials are separately invoiced.

### **04.3.1 Security equipment and materials for the maintenance and repair of the dwelling (ND)**

Includes:

- products and materials, such as paints and varnishes, renderings, wallpapers, fabric wall coverings, window panes, plaster, cement, putty, wallpaper pastes, etc., purchased for minor maintenance and repair of the dwelling;

Includes:

- refuse collection and disposal;
- fees for recycling paid by households.

#### **04.4.2.0 Refuse collection (S)**

Includes:

- refuse collection and disposal;
- fees for recycling paid by households.

**04.4.3 Sewage collection (S)**

Sewer systems, also known as sanitary sewer systems, are (most often) an underground carriage system (most usually water-borne) specifically for transporting sewage from houses and commercial building and industries, through pipes, or other conduits to treatment facilities or disposal sites. They are part of an overall system referred to as a sewerage or sewage system.

Sewage may be treated to reduce water pollution before discharge to surface waters. Sanitary sewers serving mixed urban agglomerations (including commercial and industrial areas) carry “municipal wastewater” which comprises a mix from all sources including in some cases, surface run-off and storm-water.

“Separate” sewer systems are designed to transport sewage alone. In municipalities served by sewers, separate storm drains may convey surface run-off directly to surface waters. “Separate” sewers are distinguished from “combined” sewers, which combine sewage with storm water runoff in the same conduit. “Separate” sewer systems are often preferred because they avoid the production of large volumes of combined wastewater flows. However, in certain circumstances “combined” sewers may be preferred and reduce costs.

Basic sanitation systems: are improved sanitation facilities where excreta are contained or disposed onsite. These are generally where faecal (and other) material is collected in a pit or septic tanks or are composting toilets. Their purpose is to hygienically separate human excreta from human contact.

#### **06.2 OUTPATIENT CARE SERVICES**

This group covers all preventive, dental, curative, rehabilitative and long-term care services not provided during an overnight stay. The admission criteria are irrelevant as well as the setting where the outpatient care occurs or the type of provider. As such outpatient services may be delivered in a hospital setting or outside a hospital setting including at home or even on the street by any type of health care provider. Outpatient services include all medicines and health products supplied directly by a health care provider for consumption or use outside a health facility/institution, if not separately identifiable from the service.

It also includes respite care as well as services to maintain persons in their private homes that are integrated into a package of medical outpatient care services.

Excludes:

- *dental, curative, rehabilitative and long-term care services provided overnight (06.3);*
- *control and/or follow-up services after symptoms appeared with overnight care are to be included in (06.3);*
- *laboratory and imaging services separately identifiable from the preventive service (06.4);*
- *the vaccine itself when separately invoiced from the preventive service (06.1.1.1);*
- *non-medical services to maintain persons in their private homes that are not integrated to a package of medical care (13.3.0.2).*

**06.2.1 Preventive care services (S)**

Preventive services aim at avoiding illnesses, diseases; detecting diseases (e.g. via screening). The main distinction between preventive services and other outpatient services is the criterion “before symptoms appear”.

Includes:

- immunization/vaccination services;
- family planning and counselling;
- healthy condition monitoring services (prenatal care and postnatal care services);
- general and routine check-ups other than dental;
- child growth and development check-ups;
- early disease detection services, before symptoms appear (including screening, diagnostic tests and medical examinations directed to detect communicable and non-communicable diseases before symptoms appear).

- *the vaccine itself when separately invoiced from the preventive service (06.1.1.1);*
- *non-medical services to maintain persons in their private homes that are not integrated to a package of medical care (13.3.0.2).*

**06.2.1.1 Immunization services (S)**

The expenditure involved in the consultation, both for the time and skills of the personnel and the purchase of the vaccine itself when jointly invoiced with the service should be accounted for.

Illustrative examples are immunization for:

- polio, rabies, rubella, tetanus, varicella (chicken pox) and yellow fever,
- influenza,
- measles,
- meningococcal infections, mumps, pertussis (whooping cough), pneumococcal infections,
- diphtheria, hepatitis, herpes zoster, HPV.

Includes:

- immunization/vaccination services for maternal and child care;
- travel and tourism vaccination as well as any other compulsory or voluntary immunization/vaccination service.

*Excludes:*

- *the vaccine itself when separately invoiced from the service (06.1.1.1).*

**06.2.1.9 Other preventive services (S)**

Includes:

- family planning and counselling (including genetic counselling);
- prenatal and postnatal care services;
- general routine check-up services including child growth and development;
- identification of genetic abnormalities;

- screening, diagnostic tests and medical examinations directed to detect communicable and non-communicable diseases (e.g. malaria, tuberculosis, breast cancer, prostate cancer, cervical cancer, colon rectal cancer, diabetes, HIV/AIDS and any other communicable or non-communicable disease) before symptoms appear;
- any other medical service provided before symptoms appear.

Includes also:

- laboratory and imaging services needed to provide preventive services jointly invoiced with the time and skills of the personnel (e.g. mammogram).

*Excludes:*

- *dental routine preventive check-up (06.2.2.1);*
- *control and follow-up services after symptoms appeared without overnight care (06.2.2, 06.2.3);*
- *control and/or follow-up services after symptoms appeared with overnight care (06.3);*

Includes also:

- services of dentists for aesthetic reasons.

*Excludes:*

- *all health products (pharmaceutical, medical, assistive, therapeutic) needed to deliver outpatient dental services separately invoiced from the provider's service fee (06.1);*
- *services of medical analysis laboratories and imaging centres separately identifiable from the dental services received (06.4.1.0).*

### **06.2.2.1 Dental preventive services (S)**

Includes:

- routine preventive dental check-ups.

### **06.2.2.9 Other outpatient dental services (S)**

Includes:

- all other dental services that do not require an overnight stay (excluding preventive dental services);
- all cost concerning dentures, inlays, crowns, braces, etc. (including the fitting costs).

Includes also:

- services of dentists for aesthetic reasons.

*Excludes:*

- *all health products (pharmaceutical, medical, assistive, therapeutic) needed to deliver outpatient dental services separately invoiced from the provider's service fee (06.1);*
- *services of medical analysis laboratories and imaging centres separately identifiable from the dental services received (06.4.1.0).*

**06.2.3 Other outpatient care services (S)**

Include all medical services other than preventive and dental that do not require an overnight stay aimed at relieving symptoms of illnesses, diseases, injuries (06.2.3.1); reduce the severity of illnesses, diseases, injuries (06.2.3.1); protect against exacerbation and/or complication of illnesses, diseases, injuries (06.2.3.1); restoring health status (06.2.3.1); maintaining the level of health available or preventing the deterioration of a health condition (06.2.3.2).

The admission criteria, the type of provider as well as the setting where these curative, rehabilitative, long-term care outpatient care services occurs are irrelevant as long as no overnight care is involved.

Includes:

- services at hospitals or in a hospital setting without an overnight stay (excluding preventive (06.2.1) and dental (06.2.2));
- medical day care services, i.e. services delivered in a hospital setting (sometimes in medical day care centres) to a patient who is formally admitted as long as it does not involve an overnight stay;
- home-based hospital treatment (e.g. dialysis (06.2.3.2)); medical services delivered at home (e.g. palliative care (06.2.3.2)); medical and nursing services to maintain persons in their private home (including the elderly and persons with disabilities (06.2.3.2)); nursing care delivered at home including care aimed at retarding or reducing deterioration or maintaining functionality (e.g. nasogastric feeding) or for the management of chronic diseases (06.2.3.2);
- services delivered in individual (e.g. private office) or group consulting facilities (excluding preventive services 06.2.1 and dental 06.2.2) by any type of provider (doctors, specialists, nurses and other health care practitioners);
- medical services delivered on the street as well as any other outpatient service delivered outside a hospital setting.

Includes also:

- all health products (pharmaceutical, medical, assistive, therapeutic), diagnostic imaging services and medical laboratory services needed to deliver outpatient services not separately identifiable from the provider's service fee (doctor/specialist/nurse/other health care practitioner).

Excludes:

- *medicines and health products (medical, assistive, therapeutic) separately invoiced from the provider's service fee (doctor/specialist/nurse and other health care practitioner) (06.1);*
- *preventive services (06.2.1);*
- *outpatient dental services (06.2.2);*
- *diagnostic imaging services and medical laboratory services separately identifiable from the provider's service fee (doctor/specialist/nurse and other health care practitioner) (06.4.1.0);*
- *patient emergency transportation services and emergency rescue (06.4.2.0).*

**06.2.3.1 Outpatient curative and rehabilitative services (S)**

Comprises curative and rehabilitative services that do not require an overnight stay.

Curative care comprises health care contacts during which the principal intent is to relieve symptoms of illness or injury, to reduce the severity of an illness or injury, or to protect against exacerbation and/or complication of an illness and/or injury that could threaten life or normal function. Curative services aim at bringing the person back to its original status before the cure was needed.

Rehabilitation aims to achieve and maintain optimal functioning. In some cases, after rehabilitation a patient can be better than before or only avoid deterioration.

Includes:

- all components of the curative care of illness or the treatment of injury; the surgery performed; diagnostic and therapeutic procedures; and obstetric services as long as it does not involve an overnight stay;
- curative and rehabilitative care regardless of the type of provider: (specialised) physician and other health professionals (e.g. nurses and midwives);
- curative and rehabilitative services provided in any setting: in hospitals without an overnight stay; in individual (e.g. private office) or group consulting facilities; at home or any other setting outside the hospital including on the street;
- physical, psychological and speech therapy. As such it includes services of chiropractors; physiotherapists and physical therapists; speech therapists; audiologists; inhalation or respiratory therapists, etc. All health products (pharmaceutical, medical, assistive, therapeutic) needed to deliver curative outpatient services not separately invoiced from the provider's service fee;
- all health products (pharmaceutical, medical, assistive, therapeutic) needed to deliver curative/rehabilitative outpatient services invoiced from the provider's service fee (doctor/specialist/nurse/other health care practitioner).

Excludes:

- *medicines and health products (medical, assistive, therapeutic) separately invoiced from the provider's service fee (doctor/specialist/nurse and other health care practitioner) (06.1);*
- *preventive services (06.2.1);*
- *outpatient dental services (06.2.2);*
- *diagnostic imaging services and medical laboratory services separately identifiable from the provider's service fee (doctor/specialist/nurse and other health care practitioner) (06.4.1.0);*
- *patient emergency transportation services and emergency rescue (06.4.2.0).*

### 06.2.3.2 Outpatient long-term care services (S)

Outpatient long-term care services do not aim at curing an illness or rehabilitating an individual, but to prevent deterioration of a health condition and remain at the level of health available. Some medical activities and nursing are inherent parts of this status quo. Individuals getting such type of outpatient long-term care might include for example: the elderly with limited capacity to perform daily activities; physically disabled members of the households; those with chronic conditions.

In some cases, outpatient long-term care services are part of a package of services including social assistance and social transfer. Where possible only the medical component should go into Division 06 (the social protection part should go to Division 13). If it is not possible to distinguish both the choice of the Division should be based upon the extent to which the package of services predominantly includes a social protection component (Division 13) or medical component (Division 06).

Includes:

- services of medical day-care centres; medical day-care services for the elderly and persons with disabilities;
- home-based long-term care hospital treatment without an overnight stay (e.g. dialysis);
- medical and nursing services to maintain persons in their private home (including the elderly and persons with disabilities);
- nursing care delivered at home including care aimed at retarding or reducing deterioration or maintaining functionality (e.g. nasogastric feeding) or for the management of chronic diseases (e.g. provision of the prescribed psychiatric medication);
- non-medical services to maintain persons in their private homes that are integrated into a package of care and jointly invoiced;
- all health products (pharmaceutical, medical, assistive, therapeutic), diagnostic imaging services and medical laboratory services needed to deliver outpatient services jointly invoiced with the provider's service fee (doctor/specialist/nurse/other health care practitioner).

*Excludes:*

- *medicines and health products (medical, assistive, therapeutic) separately invoiced from the provider's service fee (doctor/specialist/nurse and other health care practitioner) (06.1);*
- *diagnostic imaging services and medical laboratory services separately invoiced from the provider's service fee (doctor/specialist/nurse and other health care practitioner) (06.4.1.0);*
- *patient emergency transportation services and emergency rescue (06.4.2.0);*
- *social assistance services relate to care that enables a person to live independently in a house or apartment, community activities and occupational support given on a continuing or recurrent basis to individuals, such as activities whose primary purpose is social and leisure (13.3.0.3).*

**06.3 INPATIENT CARE SERVICES**

The overnight stay criterion is the main distinction between outpatient care services (06.2) and inpatient care services (06.3). The type of provider is irrelevant. This may be a hospital, nursing care facility, or facilities classified as ambulatory care providers but which perform occasional procedures requiring overnight accommodation.

It can also include health facilities within any type of establishment that accommodates patients justifying an overnight stay. Tuberculosis hospitals and sanatoriums are often organized to include accommodation along with medical treatment, which is the predominant purpose during a stay in such facilities.

*Includes:*

- inpatient care services comprise treatment and/or care (including dental) that requires an overnight stay;
- all medical services needed to deliver inpatient care services during the overnight stay even if separately invoiced (e.g. lab tests, diagnostic imaging services);
- medicines and health products (medical, assistive, therapeutic) needed to deliver inpatient services during the overnight stay even if separately invoiced.

*Includes also:*

- expenditures related to the "accommodation costs" for the patient (e.g. cooking, cleaning, accommodation) and associated with the hosting of patients' relatives if indispensable and associated with the overnight stay. Both types of costs are to be added if separately invoiced;
- beauty treatments carried out in hospitals (e.g. cosmetic surgery for other purposes than reconstructive surgery).

*Excludes:*

**06.3.1 Inpatient curative and rehabilitative services (S)**

Comprises curative, dental and rehabilitative care that requires an overnight stay. Inpatient curative care comprises health care contacts that require an overnight stay during which the principal intent is to relieve symptoms of illness or injury, to reduce the severity of an illness or injury, or to protect against exacerbation and/or complication of an illness and/or injury that could threaten life or normal function. Inpatient rehabilitation services that require an overnight stay aiming at achieving and maintaining optimal functioning.

Includes:

- curative/rehabilitative inpatient care services comprise treatment and/or care (including dental) that requires an overnight stay from any type of provider (e.g. a hospital, nursing care facility, or facilities classified as ambulatory care providers but which perform occasional procedures requiring overnight accommodation; services of alcoholism or drug addiction rehabilitation facilities (other than licensed hospitals); services of mental health convalescent homes or hospitals and any other health facility within any type of establishment that accommodates patients justifying an overnight stay);
- all medical services needed to deliver inpatient care services during the overnight stay even if separately invoiced (e.g. lab tests, diagnostic imaging services);
- medicines and health products (medical, assistive, therapeutic) needed to deliver inpatient services during the overnight stay even if separately invoiced.

Includes also:

- expenditures related to the “accommodation costs” for the patient (e.g. cooking, cleaning, accommodation) and associated with the hosting of patients’ relatives if indispensable and associated with the overnight stay. Both types of costs are to be added if separately invoiced;
- beauty treatments carried out in hospitals (e.g. cosmetic surgery for other purposes than reconstructive surgery).

Excludes:

- *hospital day care (with or without admission but no overnight stay) and home-based hospital treatment (06.2);*
- *services received in hospitals or hospital setting without an overnight stay (06.2) including services of facilities, such as surgeries, clinics and dispensaries, devoted exclusively to outpatient care (06.2);*
- *emergency patient transportation and rescue services (06.4.2.0);*
- *services of non-medical retirement homes for elderly persons, non-medical institutions for disabled persons and non-medical rehabilitation centres providing primarily long-term social support; retirement villages without inpatient medical services (13.3.0.2).*

### 06.3.1.0 Inpatient curative and rehabilitative services (S)

Comprises curative, dental and rehabilitative care that requires an overnight stay. Inpatient curative care comprises health care contacts that require an overnight stay during which the principal intent is to relieve symptoms of illness or injury, to reduce the severity of an illness or injury, or to protect against exacerbation and/or complication of an illness and/or injury that could threaten life or normal function. ## 07 TRANSPORT

Division 07 covers four main categories of goods and services for the purpose of transportation: purchase of vehicles (07.1), goods and services for the operation of the personal transport equipment (07.2), passenger transport services (07.3), and transport services of goods (07.4).

Purchase of vehicles covers motor cars, motorcycles, bicycles and animal drawn vehicles. Due to the high share of second-hand motor vehicles in private consumption expenditures, separate sub-classes for new and for second-hand motor cars are distinguished.

The second group concerning the operation of personal transport equipment cover parts and accessories for personal transport equipment, fuels and lubricants and the repair and maintenance of personal transport equipment. This group also includes expenditures for parking spaces in garages or in public places, expenditures for tolls and the expenditures to acquire a driving certificate.

Passenger transport services are structured by the mode of transport. However, due to fact that transport tickets may cover more than one mode of transport, a class for the combined passenger transport was created (07.3.6).

The fourth group covers postal and courier services, removal and storage services, and the delivery services of any kinds of goods, if charged separately.

Division 07 does not cover purchases of recreational vehicles, such as camper vans, caravans, trailers, aeroplanes and boats (09.1.2).

## 09 RECREATION, SPORT AND CULTURE

Division 09 covers a wide range of goods and services for recreation, sport and culture and it structured into eight groups. The first group (09.1) covers recreation durables: photographic equipment, other major durables for recreation, such as camper vans, boats, yachts, aeroplanes and the like). Group 09.2 covers non-major durable recreational goods, such as games and toys, including video game computers, celebration articles, equipment for sport, camping and open-air recreation. The third group (09.3) covers garden products, plants and flowers, the purchases of pets, and expenditures for pets, excluding veterinary services). Recreational services (09.4) cover rental, maintenance and repair of goods classified in Division 09, veterinary and other services for pets, recreational and leisure services, such as amusement parks, games of chance and expenditures for sporting services, both expenditures for practising sports as well as expenditures for attendance of sport events.

Group 09.5 covers cultural goods, such as musical instruments and audio-visual media, followed by cultural services (09.6), which cover cinemas, theatres, concerts, museums, and other cultural sites, as well as photographic services. Whether books or newspapers are in printed or electronic form is irrelevant for classifying them under 09.7.

The last group (09.8) covers package holidays, which as a bundle include all kinds of services, such as transportation, accommodation, foods provision, tour guide, etc. Expenditures for package holiday cannot be split into its components and thus a separate classification category was created. The length of the package holiday and whether the holiday destination is within the home country or outside does not matter.

## 10 EDUCATION SERVICES

Division 10 covers educational services only. The focus of Groups 10.1 to 10.4 is on formal education (that leads to degrees, certificates, or diplomas). It includes education by radio or television broadcasting as well as e-learning and correspondence courses. It includes admission and registration fees as well as tuition fees.

It also includes other education related fees, such as camps and field trips, course fees, diploma fees, examination fees, graduation fees, laboratory fees, physical education fees, capital assessment fees, etc.

The breakdown of educational services is based upon the level categories of the 2011 revision of the International Standard Classification of Education (ISCED 2011) of the United Nations Educational, Scientific and Cultural Organization (UNESCO).

This Division does not include expenditures on other education related goods and services, such as:

- school uniforms (03.1.2.4);
- education support services, such as health-care services (06);
- transport services except in the case of excursions which are part of the normal school programme (07.3.2.3);

- stationery (09.7.4.0);
- catering services (11.1.2.1);
- accommodation services (11.2.0.3).

### 10.1 EARLY CHILDHOOD AND PRIMARY EDUCATION

#### 10.1.0 Early childhood and primary education (S)

Includes:

- levels 0 and 1 of ISCED 2011 Early childhood and primary education;
- literacy programmes for students too old for primary school;
- education services for children with special educational needs.

Includes also:

- excursions which are part of the normal school programme (travel and accommodation costs).

*Excludes:*

- *child care services without educational programme (13.3.0.1).*

#### 10.1.0.1 Early childhood education (S)

Includes:

- level 0 of ISCED 2011: Early childhood education is designed primarily to support children's early cognitive, physical, social and emotional development and introduce very young children to organized instruction outside of the family context. Programmes are designed for children below the entry age to primary education and are typically centre or school-based. This education may also be provided in hospitals or in special schools or training centres;
- special education services for children with special educational needs.

Includes also:

- excursions which are part of the normal school programme (travel and accommodation costs).

*Excludes:*

- *child care services without educational programme (13.3.0.1).*

### 10.1.0.2 Primary education (S)

Includes:

- level 1 of ISCED 2011: Primary education usually begins at age 5, 6 or 7 and generally lasts for 4 to 7 years. Programmes are normally designed to provide students with fundamental skills in reading, writing and mathematics and establish a solid foundation for learning and understanding core areas of knowledge and personal and social development;
- organized instruction for children with special needs and literacy or basic skills programmes within or outside the school system which are similar in content to programme in primary education;
- literacy programmes for students too old for primary school;
- excursions which are part of the normal school programme (travel and accommodation costs).

## 10.2 SECONDARY EDUCATION

### 10.2.0 Secondary education (S)

Includes:

- levels 2 and 3 of ISCED 2011: lower-secondary and upper-secondary education. Secondary education is designed to lay the foundation for lifelong learning and human development and to provide the skills and knowledge needed either for further studies at post-secondary and tertiary levels or for entry to the labour market, or both. Programmes are increasingly subject oriented and specialized. Different study options or streams are offered, including vocational education and training;
- secondary education for adults and young people including second chance or reintegration; programmes;
- out-of-school secondary education for adults and young people;
- education services for adolescents with special educational needs.

Includes also:

### **10.3 POST-SECONDARY NON-TERTIARY EDUCATION**

#### **10.3.0 Post-secondary non-tertiary education (S)**

Includes:

- level 4 of ISCED 2011: Post-secondary non-tertiary education provides learning experiences building on secondary education, preparing for labour market entry as well as tertiary education. It aims at the individual acquisition of knowledge, skills and competencies lower than the level of complexity characteristic of tertiary education. Post-secondary non-tertiary education is typically designed to provide individuals who completed upper secondary education without qualifications required for progression to tertiary education and/or for individuals seeking specific types of employment when their secondary qualification does not grant such access. For example, graduates from general secondary programmes may choose to complete a non-tertiary vocational qualification; or graduates from vocational secondary programmes may choose to increase their level of qualifications or specialize further. Usually programmes at this level are designed for direct labour market entry. General programmes designed to give access to or improved access to tertiary education can also exist;
- out-of-school post-secondary non-tertiary education for adults and young people;
- education services for young people and adults with special educational needs.

Includes also:

- excursions or student exchanges which are part of the normal school programme (travel and accommodation costs).

##### **10.3.0.0 Post-secondary non-tertiary education (S)**

## 12 INSURANCE AND FINANCIAL SERVICES

Division 12 covers insurance (12.1) and financial services (12.2). Insurance and financial services are provided by financial corporations. These may be paid for explicitly or implicitly. Some transactions in financial assets may also involve both explicit and implicit charges. Implicit charges are not always as evident as the way in which charges are made for most goods and services and are typically calculated using a number of observable transactions. Examples of implicit charges arise from the financial services provided in association with interest charges on loans and deposits, the acquisition and disposal of financial assets and liabilities in financial markets, and insurance and pension schemes. The imputed values of expenditure on insurance and financial services are not directly observable from household income and expenditure surveys.

Insurance services are subdivided by type of insurance. Financial services are subdivided by financial intermediation services indirectly measured and by the other forms of actual and indirect charges and remittance fees for financial services. For the definition and the measurement of the insurance and financial services specific national accounts concepts (2008 SNA) do apply.

### 12.1 INSURANCE

Service charges for insurance are classified by type of insurance, namely: life insurance and non-life insurance (that is, insurance in connection with the dwelling, health, transport, etc.). Service charges for multi-risk insurance covering several risks should be classified on the basis of the cost of the principal risk if it is not possible to allocate the service charges to the various risks covered.

The basic method for measuring the service charge for non-life insurance is total premiums earned plus investment income earned from investing the premiums less adjusted claims incurred.

The basic method for measuring the service charge for life insurance is premiums earned plus investment income earned from investing the premiums less benefits due less increases (plus decreases) in life insurance technical reserves.
